# End User License Agreement

All rights to this software, its documentation and logotypes of the TRIP product family and software (altogether "Software") supplied by Smaser AG (Smaser) are exclusively owned by Smaser.

The transfer of this Software, solutions or parts thereof requires the prior written agreement of Smaser. Furthermore, the customer has the right to use licensed Software and / or process solutions supplied by Smaser to the extent specified in his contract with Smaser.

The free-to-use non-commercial version doesn't require a prior written agreement with Smaser but such customers, organizations and/or third parties agree by using the software and / or solution of Smaser to be strongly obliged to keep all rights to this software, documentation and logotypes of the TRIP product family absolutely un infringed and protected.

## About This Document

This document contains version-specific information and last-minute additions to the standard documentation.

## Requirements

TRIP Manager runs on the following Microsoft Windows 32-bit platforms:

- 2008 Server

TRIP Manager also runs on the following Microsoft Windows 64-bit platforms:

- 2008 Server
- 2008 Server R2
- 2012 Server
- 2012 Server R2
- 2016 Server
- 2019 Server
- 8.1
- 10

TRIP Manager can administer TRIPsystem installations on the above mentioned Windows platforms, and on the following UNIX platforms:

- Linux (x86-64) kernel version 2.4 or later
- Sun Solaris (SPARC) version 2.8 or later

If you install TRIPmanager on a machine on which you have or intend to have TRIPsystem installed, you must take care to use the same address length for both products, i.e. use either 32-bit for both products or 64-bit for both products; a mixed installation is not supported.

The recommended TRIPsystem version for this version of TRIPmanager is 7.2, service release 7 or later.

## Installation

Download the distribution MSI file from the TRIP download area at the Smaser AG web site.

If you already have TRIP Manager installed on your PC, you should first uninstall it (via Add or Remove Programs in the Control Panel) before you install the new version.

Please note that the installer for TRIPmanager requires .NET Framework 3.5 Sp1. If your computer does not have this version of the .NET Framework installed, the TRIPmanager installer will fail. If this happens, install the prerequisite .NET Framework on your machine, then run the TRIPmanager installer again.

## Change History

The change history can be found in the TRIPmgr Change History document.
