## End User License Agreement

All rights to this software, its documentation and logotypes of the TRIP product family and software (altogether "Software") supplied by DVG Operations GmbH (DVG) are exclusively owned by DVG.

The transfer of this Software, solutions or parts thereof requires the prior written agreement of DVG. Furthermore, the customer has the right to use licensed Software and / or process solutions supplied by DVG to the extent specified in his contract with DVG.

The free-to-use non-commercial version doesn't require a prior written agreement with DVG but such customers, organizations and/or third parties agree by using the software and / or solution of DVG to be strongly obliged to keep all rights to this software, documentation and logotypes of the TRIP product family absolutely un infringed and protected.

## About This Document

This document contains version-specific information and last-minute additions to the standard documentation.

## Requirements

TRIP Manager runs on the following Microsoft Windows 64-bit platforms:

- 2022 Server
- 11

TRIP Manager can administer TRIPsystem installations on the above mentioned Windows platforms, and on the following UNIX platforms:

- Linux
- Oracle Solaris (SPARC) version 11.4

The recommended TRIPsystem version for this version of TRIPmanager is 8.4.

## Installation

Download the distribution file (normally a zip file) and unzip it. Should the installer come with an executable file (with an ".exe" suffix"), that should be used instead of running the MSI file directly when installing TRIP Manager on your PC.

If you have an older version of TRIP Manager installed and are doing the installation without uninstalling the old version, the installer will perform an in-place upgrade and the connection configuration will be retained.

Please note that the Installer for TRIPmanager requires .NET Framework 4.6.2. If your computer lacks this or has an older version, the Installer will fail and you must install the required version of the .NET Framework before you can try again.

## Change History

The change history can be found in the TRIPmgr Change History document.
